

About Us

YENİ ANADOLU AMBULANS, with its approximately 35 years of experience and expertise, continues its activities in the manufacturing of Ambulances, Box Ambulances, 4x4 SUV Ambulances, Newborn Ambulances, Mobile Health Vehicles, Mobile Clinics, Mobile Dental Health Vehicles, Mobile Hospitals, Funeral Vehicles and Special Design Vehicles at our Ankara Ostim Address. It has consolidated its position by never compromising its customer satisfaction-oriented working style and quality with its experienced staff.

Our company, which manufactures in accordance with European standards, holds 10G Crash test, EMC test (Electromagnetic compatibility test), Heating-cooling test, and fireproofing test reports for interior coatings, which are required by EN 1789 standards.

Yeni Anadolu Ambulans, thanks to the importance it has given to quality and its determination to achieve the difficult since the first day it was founded, has become well-known in its sector in ambulances and superstructure vehicles in a short time and has never given up on these principles.

EUROPEAN STANDARD TYPE AMBULANCE

General Features

Massive side casings produced with left abs (plastic) mold technology
Massive side casings produced with right abs (plastic) mold technology
Abs (plastic) gap wall casing
Antibacteriologic epoxy floor casing
Cabinet with drawer produced by foamboard material
Heat and voice isolation and additional sheet iron casings
M1 class seat, seats
Ecr65 standard lamp and siren system
Electronic panel/redresor/invertor
External 220 v input and extension cord
Inner light (ledli)
220v and 12 v socket
Air-condition
Diesel heater (webasto type)
Centered oxygen and suction system +2x10 liter oxygen tubes
Manual stretcher platform (movable right/left)
Screening
Material prevents stretcher from slipping, draining, rounded corners
Manual slipping platform

BOX AMBULANCE

Box ambulance designs are made on chassis vehicles of different brands. Brand and model do not matter.

Box ambulance design with optional mold and different interior coating

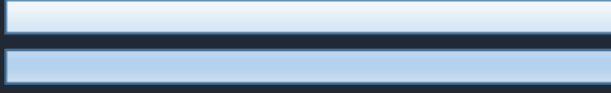

BOX AMBULANCE

Box Ambulances specially designed for different vehicle models with our 3 d design and engineering procedures.

SUV 4X4 AMBULANCE (OFF ROAD)

General Features

The vehicles with 4x4 specification are converted to ambulances depending on customer requirements. In addition to standard equipments below, rescue kits such as front, winch, rear hook, cutter-spreader can be added to the vehicle.

Storage compartments.

Attendant or doctor seat (as requested).

Cabin inner coating.

Handhold.

IV hanger.

Antibacterial PVC floor coating or epoxy coating.

Heat and sound isolation and additional metal coating.

ECR65 standard light bar and siren alarm device.

Electronic panel / rectifier / inverter.

220 V external plug-in and cable.

Cabin inner lighting (LED).

220V and 12V plugs.

Medical equipments as requested.

4 PATIENT CARRYING AMBULANCE

Vehicle is designed to carry 4 patients at the same time and is equipped with an elevator system.

Oxygen system is equipped on the right and left of the vehicle.

AMBULANCE MEDICAL EQUIPMENTS

Main Stretcher

The main stretcher produced by our company for ambulances is manufactured in accordance with the TS EN 1865-1 +A1 standards and is certified with a 10 g crash test. Made from specially alloyed aluminum material, our stretcher offers a safe transport experience for healthcare personnel and patients

Manuel stretcher loading ramp

MANUFACTURING MATERIAL : CHROME NICKEL

While stretcher on, it can be moved left and right with the help of footstep.

Metal parts are painted with electrostatic steel profile paint. Bearing system is sub-horizontal-slide system.

Locking system suitable for use with the main stretcher.

There is folding absorbers stretcher ramp at the head part.

It is manufactured according to EN 1789 Standard requirements.

Chair stretcher

The Combination Stretcher has a multifunctional structure suitable for different emergency needs. These products, which can be used as both a wheelchair and a stretcher, greatly facilitate the work of emergency medical teams.

Combination or Chair Stretcher can be adjusted to various positions to ensure the comfort and safety of the patient. These stretchers, which can be used in a semi-sitting or completely horizontal position, provide great advantages especially in sensitive situations such as spinal injuries.

TS EN 1865 certificate shows that our products comply with international quality standards. In this way, they can be used safely in health services.

SPINAL BOARD (Adult)

Standard requirements from special durable plastic.

It can be used in all types of water, fresh and salt.

It has 3 straps to keep patient immobile.

It is x-ray transparent.

It has special units to keep the patient's head immobile.

There are 5 hand grips on the right side and 5 hand grips on the left side in total 10 hand grips on the spine board. Also there are straps places on it.

HEAD STABILIZER: The head restraint is used with the backbone to prevent the neck part from moving in the transfer of the patient

**SCOOP STRETCHER**

It is manufactured from special aluminium alloy according to Turkish standards ISO 9001:2009. This light, strong, and detachable stretcher enables medics to transport the patient without moving the body. It can easily be stored in a car after folding it. It is easy to carry and use. The detachable feature of the stretcher enables medics to transport the patient from accident area to the main stretcher or the bed. Its functions immediately. The length of the stretcher is adjustable. For colour of Blue and Orange, please consult to sales department. Special production is available

**VACUUM STRETCHER**

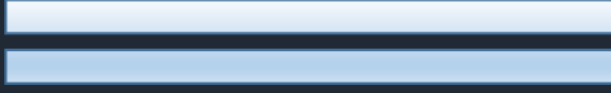

It is used to fix the person safely and comfortably after an accident. When the vacuum stretcher is air pumped through valve, it becomes hard shell taking the shape of the body. It enables medics to carry the patient without mobilizing the body to a hospital. It can be

used to transport the seriously injured or traumas.

FEATURES: It can support the body without an additional equipment. It immobilizes the body by taking its shape.

It is transparent to X-ray. It can easily be used in any vehicle due to 6x2 arm carriers. Inside is filled up with polystyrene granules, outside is covered by PVC cloth.

**Portable Blood Pressure Monitor
(stethoscope in)**

With stethoscope

- * Professional cuff - High-quality dial (0-300mmHg scale)
- * With pump and valve
- * Soft storage bag

Wall Type Blood Pressure Monitor (stethoscope in)

Portable oxygen unit + transportation bag + 2 liter

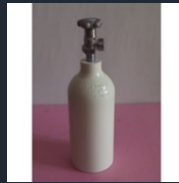

- Compressed sterile burns bandage
- Triangular bandage
- Compressed sterile Roll Bandage
- Compressed sterile Roll Bandage
- Sterile compresses (
- Non Sterile Diaper Wrap
- Elastic bandage
- Nonstick sterile compression dressing
- waterproof adhesive ,bandage
- Tourniquet
- Alcohol cleaning cloth
- Thermometer
- Ring cutter
- Zig-zag spring gear
- Stainless steel bandage scissors(140 mm.)
- Plastic tongue depressor
- Smooth plastic chin splitter
- Foley catheter (8-12-16-18)
- Eye Pad
- Nose Pad

Reanimation Kit (Complete Unit) +Bag

- 1- Magill forceps
- 1- Laryngoscope
- 1- Mouth opener Bag
- 1- Scissors cm 14.5
- 1- SET RESUSISATOR 3 size
- 1- SET Bandage
- 5- endotracheal tube
- 5- AIRWAY
- 5- injector (2 - 5 - 10 cc)
- 1- 2 liter oxygen tube

DEFIBRILLATOR

You can choose according to your needs with optional brand and model options. General features

AED SPO2 ETCO2 NIB PACEMAKER HEAT SENSOR

Pulse Oximeter

Oximeter determines oxygen saturation (SpO₂) and heart rate (pulse)

Finger Pulse Oximeter is small and light finger pulse oximeter for easy oxygen level checks

Oxygen Saturation Monitor is for use at home and on the move

Portable Pulse Oximeter display shows: oxygen saturation, pulse rate, pulse wave and pulse bar

SpO₂ Monitor gives protection when you need it if you are vulnerable to heart failure, chronic obstructive pulmonary diseases or bronchial asthma

INJECTOR PUMP

3" LCD display,
Light compact structure, high operating sensitivity,
Compatible with standard pump injectors, calibrated,
Usage with 5/10/20/30/50/60 ml injectors,
Speed mode, time mode, body weight mode,
Flow rate adjustment between 0.1-1500ml/h,
KVO, bolus and purge functions,
IP24 high level protection from external factors,
12 hour working capacity battery,

Sugar measuring device (Glucometer) +Strip

It is supplied with different brands and models on request.

Portable Vacuum Aspirator

It is supplied with different brands and models on request.

TRANSPORT VENTILATOR

It is supplied with different brands and models on request.

INFUSION PUMP

It is supplied with different brands and models on request.

Inflatable Splints (6 pieces)

Immobilizes upper and lower extremity fractures in a fast, easy and secure way, helps stopping of internal bleeding.

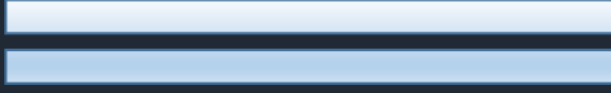

Special PVC laminate material allows working at -25 - +45 'C.

Self-sealing valves to prevent air leakage.

Zipper closure. X-Ray transparent. Set of 6 splints: ankle, ankle and long leg, short leg, long leg, wrist and short arm, wrist and long arm.

Packed with inflating pump and special carry bag.

**Traction Splint Set**

Traction splints used on the leg in case of leg bone fractures,
Prevents damage to broken bones and tissues,
Length-adjustable aluminum telescopic chassis,
Leg fixation bands connected with velcro,
Automatic tension pulley,
Two different sizes for adults and pediatrics,
Set with carrying bag,
CE certified,

**KED Life Vest**

Fractures and injuries of the spine and neck, used for transporting patients safely and is supplied with a special carrying case. Special color-coded, easy opening and locking belts can be used through the night, and moments that require urgent intervention. It can go through X-ray. It's functional design is suitable for men and women anatomy

**CERVICAL COLLAR**

Single piece flat design enables fast and easy application with Velcro closures. X-Ray transparent HDPE material, large chin support, foam padding. Large tracheal opening for intubations, rear ventilation panel. Cleaned easily.

**Diagnostic Set (Otoscope - Ophthalmoscope)**

It is supplied with different brands and models on request.

Emergency birth Set (disposable)

Burn Set (disposable)

Oxygen systems

Oxygen Tube 2x10 ltx200 bar

Complete Oxygen System (Regulator-Prize-Flowmeter-Moisture-Link)

Stationary Vacuum System

Disposable Medical Equipments

Oxygen Mask (Adult)

Oxygen Mask (Pediatric)

Oxygen Nasal Cannula (Adult)

Oxygen Nasal Cannula (Pediatric)

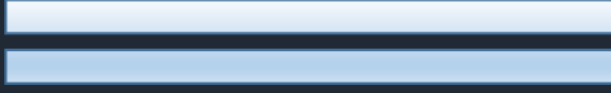

Suction Catheter (3 different sizes)

Urinary Catheter and Bag in Miscellaneous

Serum Set and intracath set-

Injector (2 - 5 - 10 cc)

AMBULANCE TECHNICAL EQUIPMENTS (ELECTRICAL SYSTEM)

Ambulance roof lamp and siren system

Front and rear ceiling lamp

side square light

siren and announcement system

installation and design are done as you wish within the scope of the project

Ambulance Electronic Control Panel and Card

interior lighting control

heating cooling control

turbo ventilation control

inverter control

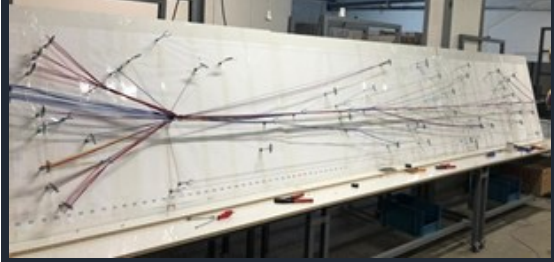

The control panel is our own design and software can be loaded in different languages according to quantity.

AMBULANCE TECHNICAL EQUIPMENTS (ELECTRICAL SYSTEM)

Ambulance Electrical cable set

It is designed according to the standard ambulance electrical system. Upon request, an ambulance cable set is prepared in the design you requested.

12-220 volt inverter

12-220 volt inverter supports the operation of medical devices by converting 12 V energy in the vehicle to 220 Volt energy. Depending on the preference, the device is supplied as modified or full sinus. A suitable device is supplied for different voltage types.

12v Battery charger

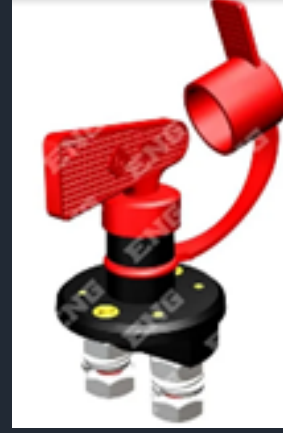

It supports the ambulance electrical system with different models and brands to charge the main battery and spare battery in the vehicle.

MASTER SWITCH

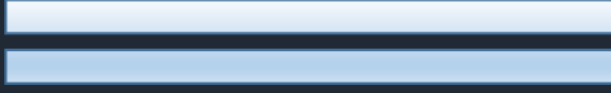

The master switch, installed in a suitable place in the driver's compartment, deactivates and reactivates the entire electrical system in the patient cabin.

Please contact us for different models and brands.

**Power relay 12V 100A****Starter relay 12V 30A****12V-24 V turbo fan**

It provides air circulation inside the vehicle. It is bi-directional and releases the air inside and takes in the clean air outside.

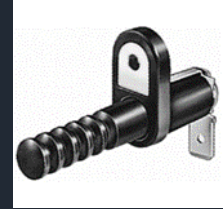

**12V Power Fuse**

European Standard Safety Fuse Panel Positioned Between Vehicle Electrical System and Ambulance System

**LED lighting / Spot lamp****12 V-24 V-220 V-110 V**

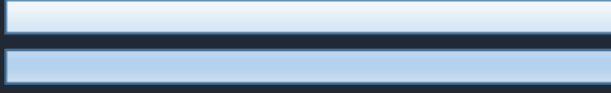

The LED lighting system that provides illumination inside the vehicle is designed according to the Ambulance standard. We have applications in different sizes and quantities.

**DOOR SWITCH****220V SOCKET + cable**

It is designed to receive 220 V energy from outside the ambulance vehicle and is leak-proof. An extension cable of 5-15 m can be added upon request.

Please get information for different models and designs.

**12 /24V socket****110 /220 V socket**

The number and quantity of sockets designed for the ambulance rear cabin are determined according to the project. We have products for different voltage groups.

**Fuse panel 220V**

Specially Designed Safety Fuse Panel for Inverter and External Network Voltages

**12V /24 V fuse panel**

Second safety system

**Intercom**

Provides communication between the driver's compartment and the patient cabin. Please get information for different models and brands.

AMBULANCE HEATING COOLING SYSTEM**AIR CONDITIONING**

It is designed for ambulance and will be designed according to the geographical climate conditions you live in. Please contact us for more information.

**INDEPENDENT HEATER (DIESEL OR PETROL)**

It is designed for ambulance and will be designed according to the geographical climate conditions you live in. Please contact us for more information.

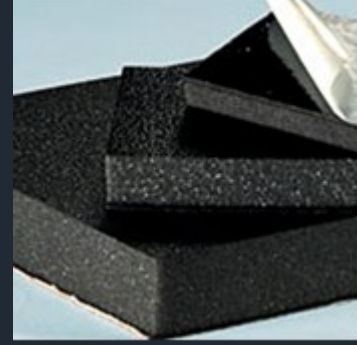

**WATER SYSTEM HEATER DRIVEN FROM VEHICLE ENGINE**

It is designed for ambulance and will be designed according to the geographical climate conditions you live in. Please contact us for more information.

AMBULANCE TECHNICAL EQUIPMENTS (INTERIOR COATINGS) TRIM**SOUND AND HEAT INSULATION**

The patient cabin section side walls and ceiling are insulated with self-adhesive rubber sponge heat insulation material.

**Reinforcement**

The area where the cabinet and medical parts will be attached in the patient cabin is reinforced with sheet metal and profiles.

**FIBER AMBULANCE MOLD SET**

Right side trim

Left side trim

Ceiling trim

Partition trim

Fiber molds for different vehicles can be designed upon request, can be provided that if they are in large quantities

ABS PLASTIC AMBULANCE MOLD

Right side trim

Left side trim

Ceiling trim

Partition trim

Abs plastic molds for different vehicles can be designed upon request, can be provided that if they are in large quantities.

CLASSIC TYPE TRIM

All surfaces are made of aluminum composite coating and cabinets are made of mdf wood

Designs suitable for all types of vehicle models.

SEPERATOR CABINET (MDF)

It is made of wood or plastic based foamboard.

Cabinet design is available upon request.

**Ceiling handle bar**

It is manufactured from aluminum or metal pipe with optional color options.

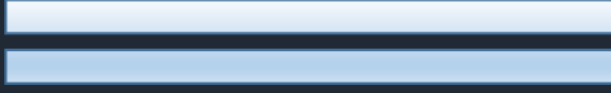

**Floor Covering**

Epoxy coating or antibacterial non-slip non-scratch PVC floor coating is used for the floor covering.

**IV HANGER**

It is optionally produced from aluminum or plastic material.

**STRETCHER, MEDICAL DEVICE, MEDICAL BAG FIXING
PLASTIC STRAP (L)**

**STRETCHER, MEDICAL DEVICE, MEDICAL BAG FIXING

MOBILE HEALTH VEHICLES

General Features

We work on this optional group of product depending on the project. 3D drawings and location plan are given to customer just after preliminary agreement according to demanded product and specialty.

Panel van, delivery car with covered body, semi-trailer or minibus, autobus

Isolation coverage of the vehicle (for heat and voice)

Storage divisions, optional choosing color

Medical divisions (optional)

Central oxygen system

Hospital equipment and apparatus (optional)

Floor coverage (epoxy or PVC) choosing color optionally

Lighting system 12v-220v

Generator

External 220 v energy and extension cable

Full electrical system

Split air-condition

Clean-dirty water storage

You design it, we build it.

MOBILE X-RAY VEHICLES

General Features

Mobile x-ray vehicles are mounted on van type vehicles, box type vehicles, buses or trucks according to your purpose of use.

interior coatings abs plastic, fiber or aluminum composite panel

base coating pcv or epoxy coating

complete electrical system 220 V-12 V

sockets 12-220V

R&D for different electrical voltage

waste water clean water tank

generator

inverter

electrical control panel

turbo ventilation

heating cooling system

x-ray room lead coating (in atomic energy norms)

x-ray device, mammography CR or DR system

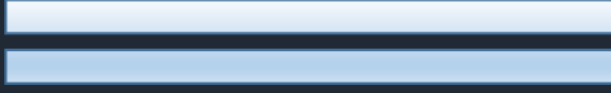

Yeni Anadolu Ambulans İmalat ve Özel Maksatlı Araç Dizaynı San. Tic. Ltd. Şti.

MOBILE SEARCH AND RESCUE VEHICLES

General Features

Designed for 4X4 van, box, pickup, truck type vehicles.

Optional equipment

Rescue stretcher

Hydraulic/electric cutting and separating devices

Rescue winch

Jump Bed

Light Tower

Drills and Breakers

Rescue rope

Flashlights

Warning lights

Generator

Live Search Camera

Drone

Jack

Gas, heat radiation measuring devices

First aid kit

Resuscitation bag

AED defibrillator

Neck Collar

Basket stretcher (for helicopter)
